

Exam presentation and report

Dr. Aurora Rossi, Laura Bülte

24 July 2026

Presentation

Day: September 16, 2026

Time: 13:00-17:00

Place: Room 2.074, CS building

25-30 minutes talk followed by 10 minutes of questions/discussion.

Expected content

- **Problem introduction** (both formal and with a visual example)
- High-level ideas of the **main algorithm** (no proofs needed)

Suggestions: interesting implementation details

Suggestions: process of pull request reviews

- Briefly position **second approach** in relation to first one

- **Experimental evaluation**

experimental setup (machine and datasets)

comparison to baseline (if applicable)

comparison of first and second method

Important: present results with plots

- **Conclusion**

Report

Deadline: September 30, 2026

How: by email to Dr. Aurora Rossi, Laura Bülte, Prof. Dr. Petra Mutzel with **pdf report, uni id** and all info that we need to register the exam.

Report: 10-15 pages of main content + bibliography (+appendix)

use Lab template

Report content

- **Problem introduction** and preliminaries
- The **main algorithm**
- The **second approach**
- Documentation of your implementation (high-level)
Link to your implementation
Optional: interesting implementation details
- **Experimental evaluation**
experimental setup (machine and datasets)
comparison to baseline (if applicable)
comparison of first and second method
Important: present results with plots
evaluate both runtime and objective performance
- **Conclusion**

Lab report
Title of Report

Name of participant
July 23, 2026

in the Context of the Lab
Computational Analytics
Open-Source Graph Software Engineering
of Prof. Dr. Petra Mutzel
Summer Semester 2026

Supervisor:
Dr. Aurora Rossi
Laura Bülte
Prof. Dr. Petra Mutzel

Other info

- Results within 4 weeks after the presentations
- For julia code snippets in latex see <https://github.com/wg030/jlcode> (give a star if you use it!)
- See template attached to the mail
